Professional Summary

Dynamic Computer Science graduate with proven expertise in web and game development, delivering user-centric full-stack applications and engaging mobile games. Skilled in C++, C#, Unity, and modern web frameworks like Next.js and React. Demonstrated ability to lead projects and collaborate effectively in team environments. Seeking challenging roles in software or game development to leverage technical skills and create impactful solutions.

Technical Skills

- Languages : C++, C#, PHP, Javascript, SQL, Python
- Frameworks : NodeJS, React, Next.js, Flask, Scikit-Learn
- Tools : Git, GitHub, Jupyter Notebook, LaTeX, MySQL, Excel
- Soft Skills : Leadership, Problem-Solving, Quick Learner, Multitasking

Education

- Bachelor of Technology in Computer Science and Engineering Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar | Oct 2021 - Dec 2025 | CGPA: 8.53
- Central Board of Secondary Education (Class-XII) Guru Teg Bahadur Public School, Durgapur | 86.5
- Council for Indian School Certificate Examinations (Class-X) Assembly Of God Church School, Ukhra | 83.33

Experience

- Game Developer Intern, MOBTIONS, India | Dec 2024 - Jun 2025
 - Developed and deployed production-level HTML5 games on Vercel, improving deployment efficiency by 15%
 - Designed and published 4 Unity-based Android games, collectively achieving 2K+ downloads on Google Play Store.
 - Spearheaded integration of React-based frontend features and supported backend API development using PHP and MySQL.
 - Collaborated with cross-functional teams to refine game mechanics, enhancing user engagement by 10%.

Projects

- Tier-Based Event Showcase(Clerk.dev authentication, Supabase-PostgreSQL, Tailwind CSS):
 - A **Next.js** app with **Clerk** authentication where users access events based on their subscription tier (free, silver, gold, platinum)
 - Events are securely fetched using **Supabase Row-Level Security** policies filtered by user metadata.
 - Users can upgrade their tier with one click, which instantly updates their access level via a **Clerk + API route integration**.Vercel Link...
- Flight Ticket Prediction Model(Python,Pandas,Matplotlib,Seaborn) :
 - Developed a **machine learning** model to predict flight ticket prices using **exploratory data analysis** on real-world datasets
 - Achieved meaningful **predictive insights**, aiding potential users in making cost-effective booking decisions.GitHub Link...
- WhatsApp Chat Analyzer(Python,Streamlit, Pandas, Seaborn, Urlextract, RE, Matplotlib) :
 - A chat analyzer tool that processes **individual** and **group** chat data, delivering **user activity** and **sentiment insights**.
 - Visualized key metrics including **active users**, **word clouds**, **activity timelines**, and **bilingual text usage patterns**.GitHub Link...
